DELIVERING A SUPERIOR SOLUTION TO FOOTWEAR SANITIZATION

Clean Beams' DryZap!™ technology is the 1st of its kind in footwear sanitization using pulsed ultraviolet light (PUV) technology to control and eliminate harmful pathogens - a critical component in controlling your environment

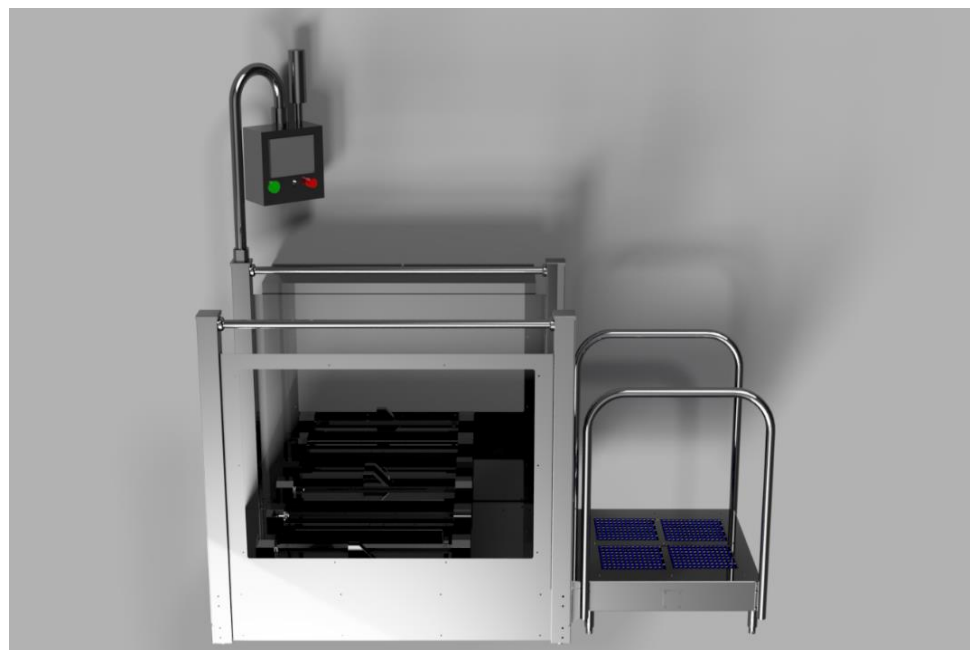

A PROVEN SOLUTION TO A PROVEN PROBLEM

The Proven Problem!

- **Foot traffic** is one of the least managed and most uncontrolled bacterial breaches to clean environments
- **Protect your Customers** - thousands get sick and hospitalized each year from food borne illness - and more than 3,000 in the U.S. will die
- **Protect your Brand** - a single recall can cost a company as much as \$100 million and costs the US economy over \$150 billion yearly

The Proven Solution!

Clean Beam's patented footwear sanitization solution uses Pulsed UV light, along with our pre-brush platform, deactivates pathogens within in 6 sec.

The Proven Solution | Attributes

- **Proven more effective**
 - 99.999% effective in studies supervised by Novolyze
- **Sustainable**
 - Chemical Free, No Disposables
- **Dry**
 - No water or drains required
- **Traceable**
 - For Control, Compliance and Predictive Analytics
- **Lower total cost of ownership**
 - lower material and labor costs lead to lower total cost of ownership
- **Safe to Use**
 - Touchless Activation
- **Reliable and Easy to Maintain**

Client Testimonials

“We piloted Clean Beam’s foot sanitization solution in one of our plants - it performed better than expected. We swab over 1000x/month and showed a significant reduction in micro results in our environmental monitoring program. Before installation, we had concerns about employee acceptance and traffic flow. After a few days, it was just a normal operating procedure - no resistance whatsoever! “

Quality Executive, Dietary Supplement and Nutritional Foods Industry

The Clean Beam Leadership Team has total commitment in making sure that the PUV shoe cleaning system is correctly deployed at the customers’ site, from providing personalized onsite demo with Q & A session, implementation training support, and ongoing partnership!!!
